Final Examination Part I

Document all features of the website that you have developed and presented. Take screenshots that illustrate every feature and include detailed descriptions of each. Submit a PDF copy of your output on or before 8:15 PM. Note that only the outputs submitted on time will be scored.

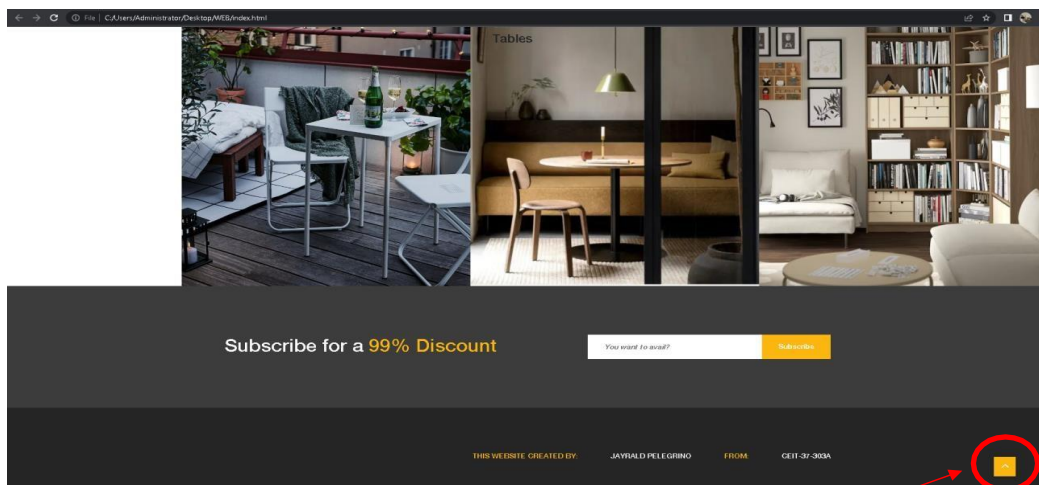

Part II of the final examination will be posted at 8:30 PM

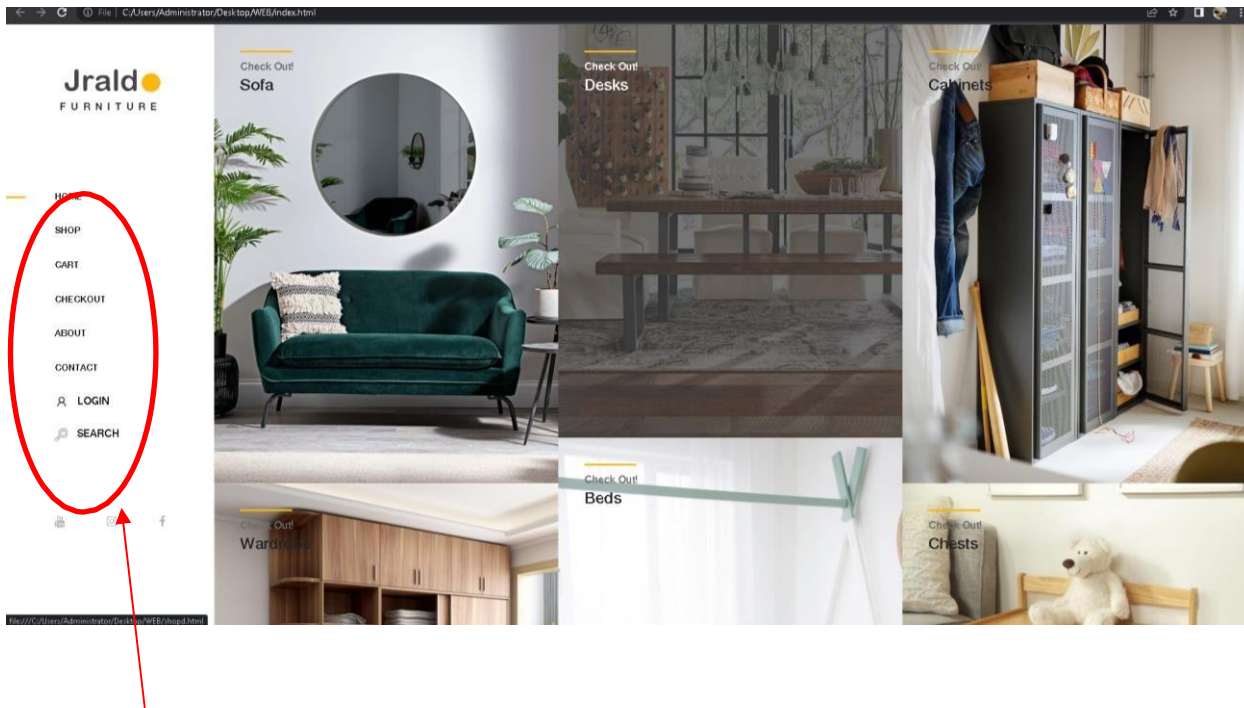

Homepage

Here on the homepage, you can see all the contents that are placed there, all of them are clickable, which is when you click on one right away, it's on the content of the furniture you chose and on each of its footers at the bottom, which is when you subscribe to the clinic. You will be directed to the login page which is responsive and all the buttons are clickable then, the menu bars on the side do not fade once you click on a new webpage

Among the user interface design principles discussed in class, For me on my website I made you can see a principle that Reduce users' memory load that you can reduce short term memory load by designing screens where options are clearly visible, or using pull-down menus and icons and also my buttons are few but accurate. Moreover Make the user interface consistent, Because my buttons there are on the side, he is consistent, one of you is the clinic, which button is there except for the product and login page info. And can be seen in the following pictures:

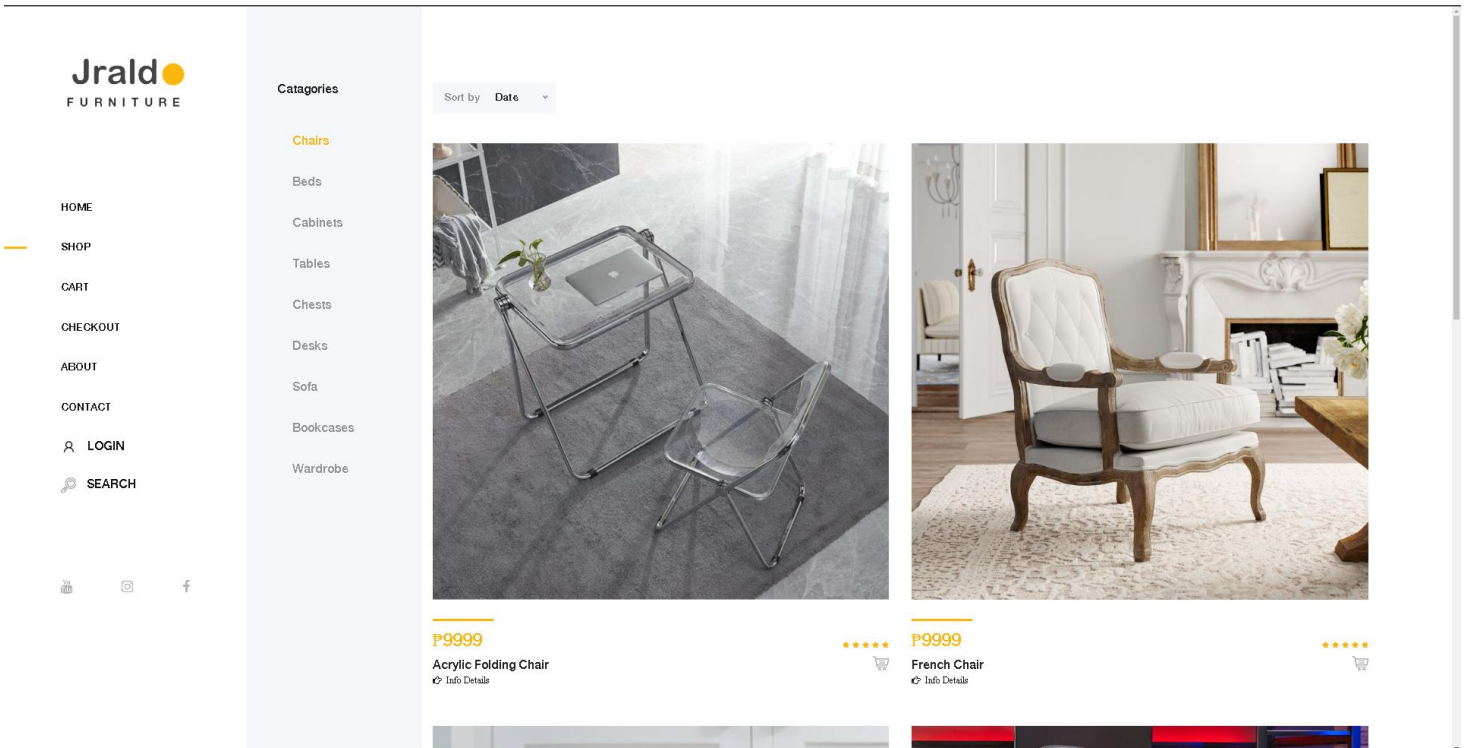

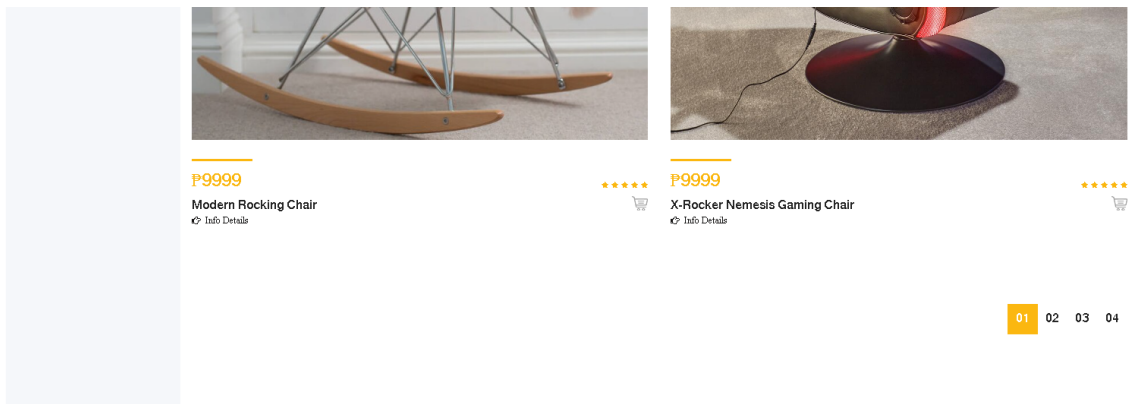

Reduce users' memory load

Make the user interface consistency

Here, which is the same as the footer, it is responsive for users who can use it and is not confused for users who will look at it, and its color is only consistent with the texts that I used that a user can see.

Product Details Page

Here, the product is zoomed and it has details, if you click the go to cart, it will go to the cart and our button is working if you can see it in the screenshot

Modern Rocking Chair ₱9999

Qty -1 +

X-Rocker Nemesis Gaming Chair ₱9999

Working

On this page, if you click the checkout or don button on the menu bar of the cart, this is what it will look like if you can see it in the screenshot and if you can see the color scheme that I used and etc. it is only consistent with what's on the other page. And when you submit an order which is my website will respond which is responsive your order is submitted and there is a check sign.

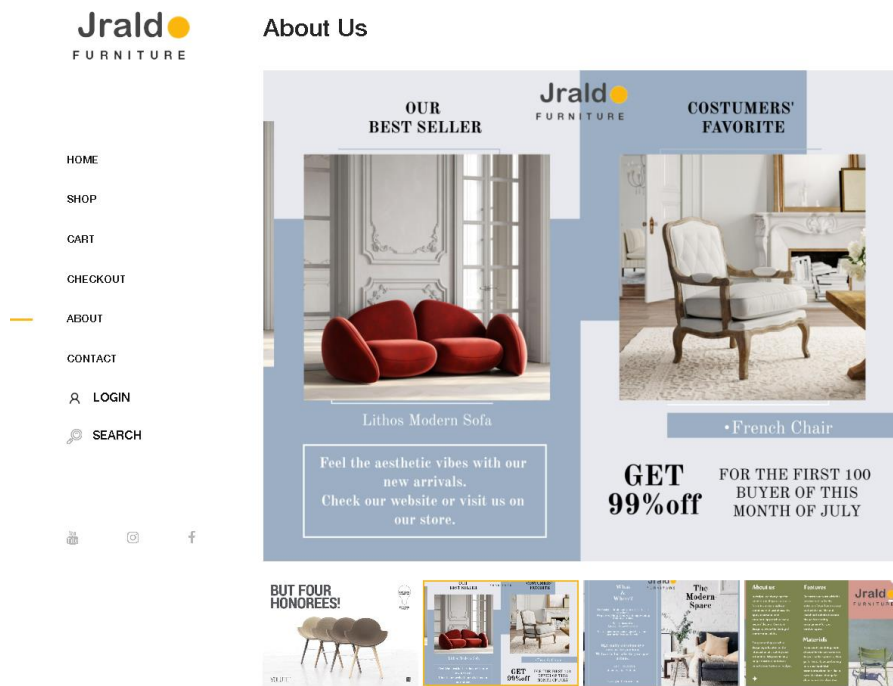

Login Page

A login form for 'Jrald FURNITURE'. The form is white with a yellow 'Log In' button and a red 'Login with Google' button. It includes fields for 'Username' and 'Password', a 'Remember me' checkbox, a 'Forgot Password' link, and a 'Go to Homepage' link. Three yellow arrows point from the text 'Working and Responsive' at the bottom to the 'Remember me' checkbox, the 'Log In' button, and the 'Go to Homepage' link.

Here on the login page which are the buttons and the check box is responsive which is clickable and he is not even connected to the other link. but that button can be linked and clickable just include it.

Working and Responsive

About Page

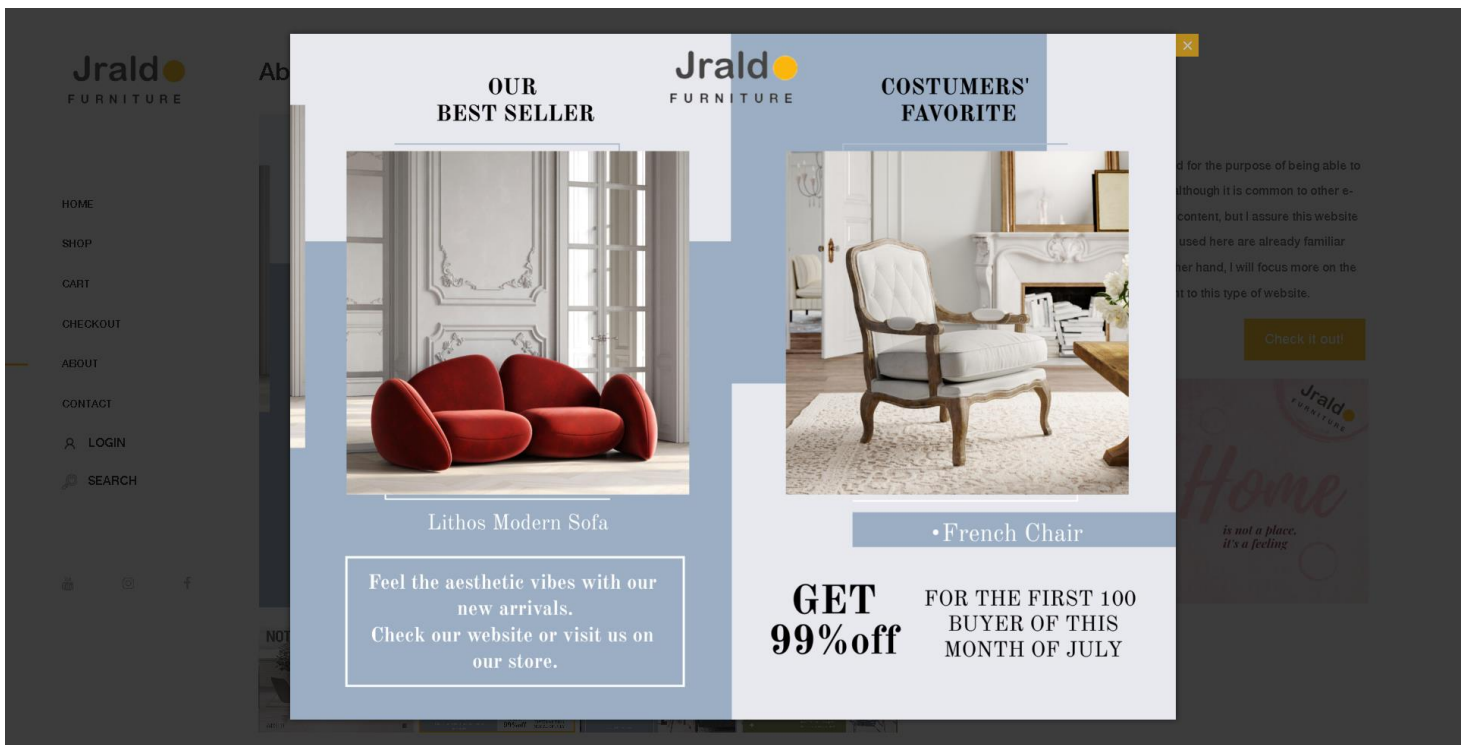

Jrald Furniture's for?

Hello to you shoppers, this website was created for the purpose of being able to shop for limited furniture items design online, although it is common to other e-commerce websites and similar to this type of content, but I assure this website that it is easy to use and because the designs I used here are already familiar and a user will notice that right away. on the other hand, I will focus more on the future design of this website and added content to this type of website.

Connect With Us

Check it out!

That he zooms once you click the pictures and they are all clickable, and first picture is Gif which means moving picture I used. When you click the connect with us, it will go straight to the contact page, while when you check it out, it will go to the shop page of each furniture.

Here on the buttons of the menu bar, everything is working and connected to the hyperlinks to the contents of my website and the one at the bottom which is the social media of this website that I made, which is working when you click those buttons That's why he will redirect to social media accounts.
